

HALVING MACHINE 2

foodmate

Poultry Processing Systems

The Foodmate Halving Machine 2 removes the breast bone from a half bird. The lengthwise half cut chicken (done by the precut machine) will run into this module, breast side first, and will be guided on the side of the hips into the module. The Halving Machine can be part of an existing cut-up line and

is designed for partial processing of poultry goods, especially chicken. The Foodmate Halving Machine 2 contains a stainless steel frame and motor, requires minimal maintenance, and is easy to clean. The Halving Machine 2 is suitable for all cut-up systems.

Our mission is to innovate, automate and bring cost-effective solutions to the industry.

HALVING MACHINE 2

Key Benefits:

- Allows for a maximum of 6,000 birds per hour

Foodmate is an equipment manufacturing company based in the Netherlands. Founded in 2006, we focus primarily on poultry processing, and we recently launched Foodmate Brasil, expanding our worldwide distribution into South America. Driven by research, paired with unmatched knowledge and decades of experience, it's our mission to innovate, automate and bring cost-effective solutions to the industry.

Our product line spans a wide assortment of processing equipment designed for live bird handling, killing and defeathering, eviscerating, chilling, weighing, cut-up systems, deboning and more.

Our team represents decades of industry knowledge and experience resulting in the engineering, development and implementation of new designs for our clients and their ever-changing needs.

Technical Specifications:

- Stainless steel frame and motor
- Motor (IP66) power is 2 x 0,75 kW
- Machine dimensions:
 - Length: 721 mm
 - Width: 670 mm
 - Height: 1348 mm
 - Weight: approx. 150 kg
